EXPERIENCE

Jet Support Services, Inc. (JSSI)

Clark Pampanga, Philippines

Enrollment Analyst

Mar 2021 – Apr 2025

- ETL (Extract, Transform, Load)
 - Extraction of aircraft-related data in PDF/Scanned form from multiple sources including maintenance reports from various maintenance tracking software such as CAMP, FlightDocs, Aviator, Cesscom, Textron, etc.
 - Transform the data by standardizing formats, validating the information such as compliance data, component data, and maintenance history to ensure completeness and consistency.
 - Load the transformed data into the Traxxall Systems to ensure that accurate records are maintained.
- Develop codes in VBA to create macro-enabled Excel spreadsheets to automate repetitive tasks, data processing, and reporting functions.
- Optimizes Excel functions and features such as pivot tables, VLOOKUP, XLOOKUP, data validation, and conditional formatting.
- Create custom Salesforce Lightning reports to monitor and analyze team performance and other relevant KPIs.
- Utilizes MySQL and Power BI to extract, analyze, and visualize data, creating interactive dashboards tailored to customer requirements.
- Source to target system data mapping
- Data entry of mapped source to target system
- Responsible in the accurate configuration of every aircraft model enrolled in the Traxxall system (e.g. Aircraft maintenance programs, categories, Engine maintenance programs, Inspection tolerances, etc.)
- Monitors aircraft modification status and ensures all applicable tasks are being tracked accordingly

Aviation Partnership Philippines Corporation (A+)

Pasay, Philippines
